# Seguin Township Report to Council

**Prepared for:** Township Council    **Department:** Development and Protective Services

**Agenda Date:** September 21, 2020 **Report No:** DPS-PL-2020-102

---

**Subject:** **E01-2020-0004-H Exemption Request to Fill By-law No. 2008-105**  
**Owners:** John Watson  
**Agent:** Alex Foreshaw, Coulson Brothers (Contractor)  
**Subject Lands:** Plan M659 Lot 6  
**Civic Address** 9 Yoho Island  
**Roll No.:** 4903-010-005-11572

---

## **1.0 Recommendation**

That Council grants the requested exemption to Fill By-law 2008-105, subject to the following:

- a) Use of siltation fences and straw wattles to prevent any erosion;
- b) Tree removal between the access road and shoreline is not permitted; and,
- c) Planting of native vegetation on the disturbed areas to retain the soils after the heavy equipment access road is no longer needed.

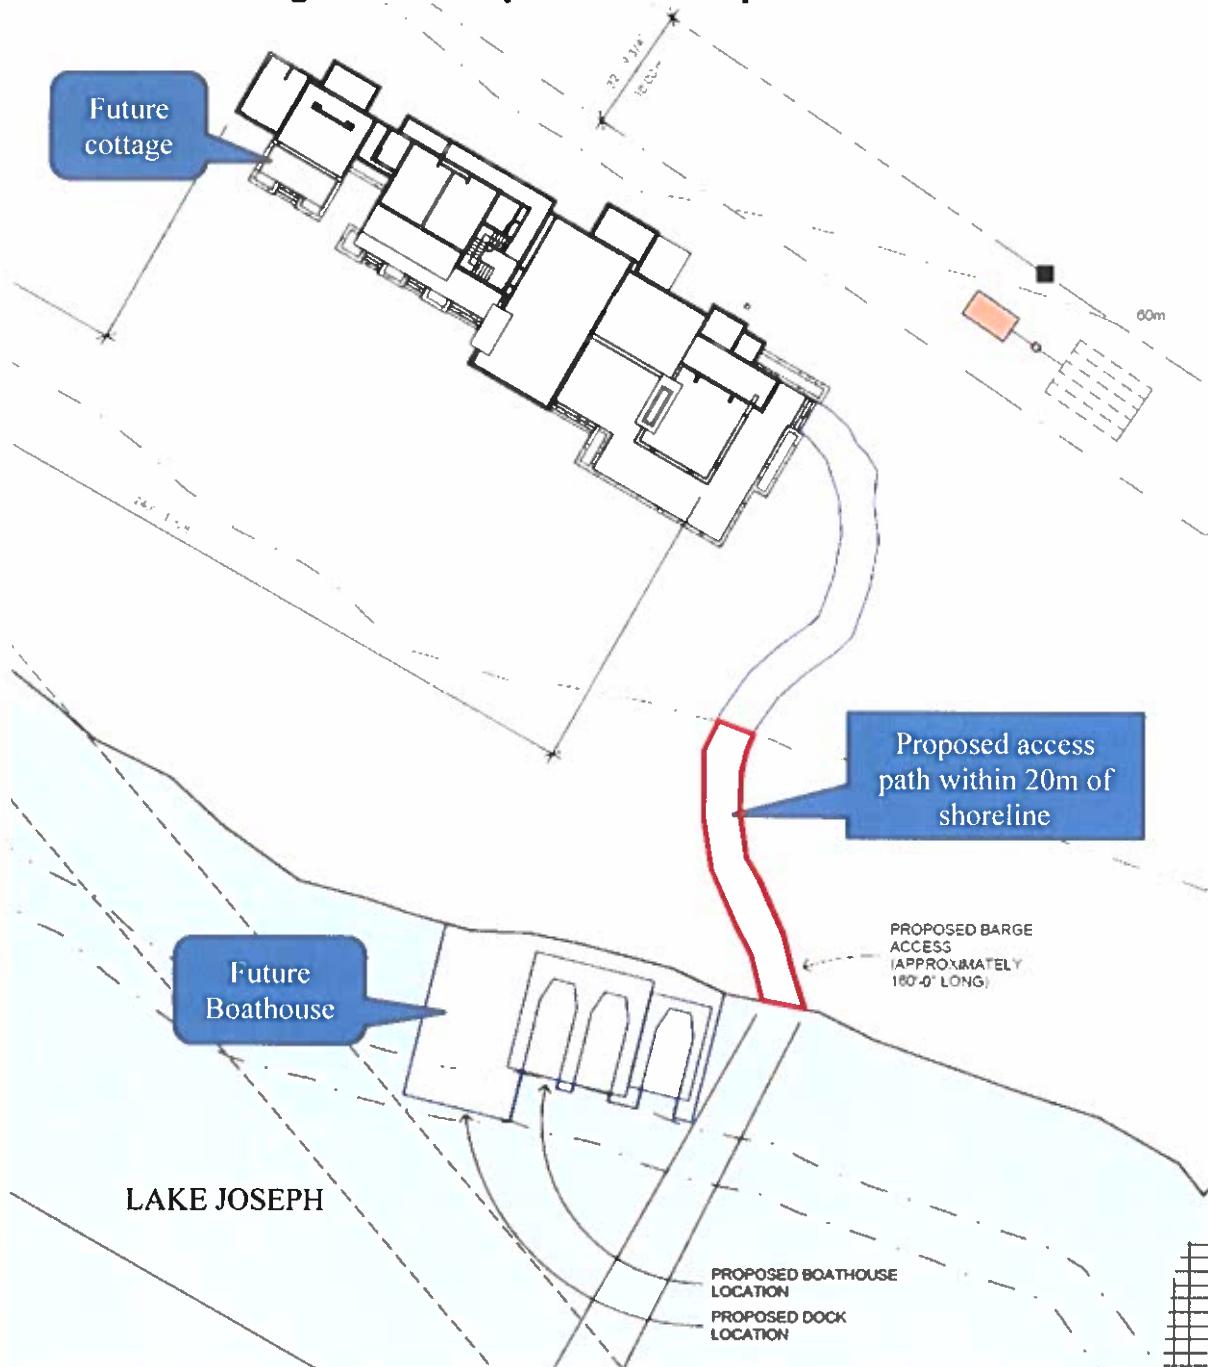

## **2.0 Requested Exemption**

The applicant is seeking an exception to the Fill By-law 2008-105 to install a construction equipment access path within the first 20 metres from the shoreline. The access path is approximately 23 metres long (within the 20 metre front yard) and 3 metres wide, and enters at the center of the lot and runs northeast perpendicular to the shoreline. The access path is required to connect the shoreline landing area to the future cottage building site that is 30 metres back from the high water mark of Lake Joseph. The access path would be constructed of 2" crushed granite, averaging in depth from 6" to 12" and would be top finished with cedar chips to reduce water flow.

Upon completion of cottage construction, any disturbed areas along the path will be re-planted and rehabilitated. The resulting 3 metre wide shoreline access path would then comply with the Fill By-law which allows for minor

landscaping activities (such as access paths and selective tree removal) within 20 metres of the shoreline.

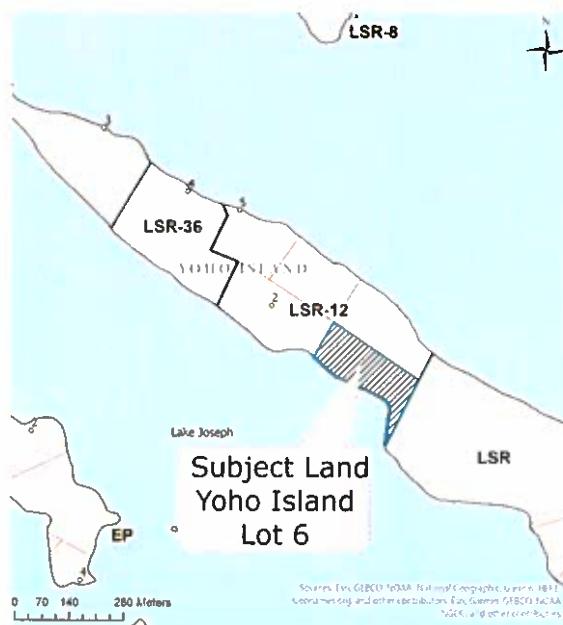

**Figure 1 – Proposed access path location**

### **3.0 Background**

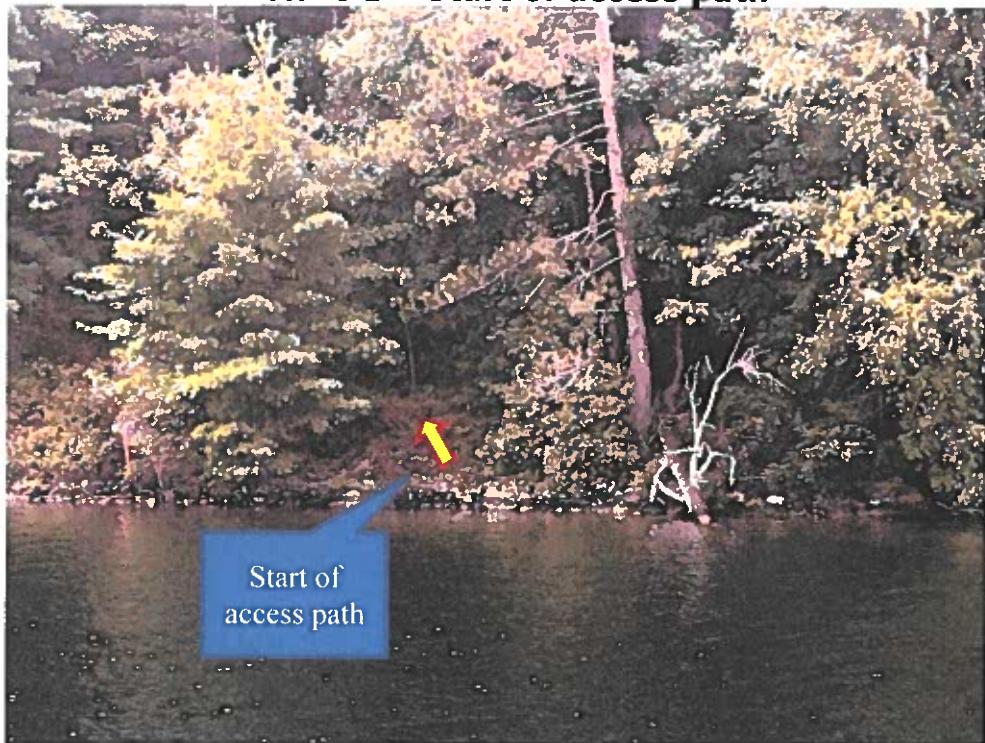

This portion of Yoho Island was developed by way of Plan of Subdivision that was registered in 2009. It consists of 6 lots which were created for water access lots supporting cottages and boathouses. The subject property has an area of 1.31 hectares, and 205 metres of frontage. The lot is currently vacant, however a cottage, detached accessory structure, and 1.5 storey boathouse are proposed for development.

**Figure 2 – Subject Lands**

Staff attended the site on October 10, 2020 as part of pre-consultation for the proposed exemption. The location of the access path was clearly marked. The terrain along the proposed access route was relatively flat from the shoreline to approximately half way along the path, and then sloped moderately upwards toward the future cottage building site. Tree cover within the immediate shoreline area consists of a mix of mature hemlock and cedar, pine, and various hardwood species. Tree removal required for installation of the access path is minimal, where several were observed to be dead and others were less than 6" circumference. Approximately 6-9 trees would require removal, however would meet the exemption parameters of the Tree Cutting By-law.

**Picture 1 – Start of access path**

**Picture 2 – Access path looking northeast from shoreline**

**Picture 3 – Access path looking toward shore from 20m setback**

**Picture 4 – Shoreline of subject lands showing vegetative screening**

For comparison, Council approved a similar Fill By-law exemption request on the neighbouring lot at 2 Yoho Island in October 2019. The access path constructed is similar to this proposal, albeit slightly wider (4 metres), and was completed by the same contractor as this application. The following images are of the access road at 2 Yoho Island which is currently being used for construction of a cottage, and will be rehabilitated once cottage construction is complete.

**Picture 5 – Start of access path at 2 Yoho Island**

**Picture 6 – Access path within 20 metre shoreline area 2 Yoho Island**

## **4.0 Analysis**

The Fill By-law applies to shoreline areas (20 metres inland from the high water mark). The primary intent of this By-law is to preserve water quality by prohibiting the placing of fill in shoreline areas. The By-laws prohibit any work that could significantly alter the natural vegetation and grade that could potentially result in increases of runoff into abutting lakes.

The contractor is proposing to construct an access road that is approximately 23 metres long within the 20 metre shoreline setback area and 3 metres wide that will require fill in some areas to level the terrain. No blasting is required. Based upon a site visit, staff noted that the route of the access path was fairly flat in the area that would parallel the shoreline. The path encounters steeper topography as it moves further inland and moves away from the shoreline. The vegetative buffering between the path and shoreline from the entrance to the steeper terrain consists of mature cedar and hemlocks that provide a year-round visual screen to the path. The contractor has also indicated that the path follows the more level portions of terrain to minimize the amount of fill required.

Once the cottage and septic have been constructed and heavy equipment has been removed from the site, the access road will be re-vegetated, and forthwith used by the owner as an access path to the shoreline and future boathouse.

Staff are of the opinion that the request for exemption is appropriate, as the construction access path will remain visually buffered by mature tree cover, and will be suitably remediated once construction is complete. The proposal is consistent with the intent of the Fill By-law and with the Seguin Official Plan with respect to protection of water quality, and preservation of the natural character of shorelines.

## **5.0 Conclusion**

In this instance, the proposed construction access path will not compromise the primary intent of the Fill By-law which is to preserve the water quality of the abutting lakes and to maintain the natural character of shorelines within the waterfront community. Staff recommend that the exemption request be granted, subject to the following mitigation and rehabilitation measures:

1. Use of siltation fences and straw wattles to prevent any erosion;
2. Tree removal between the access path and shoreline is not permitted; and,

3. Planting of native vegetation on the disturbed areas to retain the soils after the access path is no longer needed.
